

Risk Assessment – Vermin/Pest Control.

Company:	SES Engineering (Newark) Ltd	Date:	16.05.2022	Review Date:	16.05.2023	Ref:	SES/0052
-----------------	------------------------------	--------------	------------	---------------------	------------	-------------	----------

Operation:	Vermin/Pest control.			Persons at risk:	Employees, 3 rd parties		
HAZARD	Assessment			CONTROL MEASURES TO REDUCE THE RISK	Re-assessment		
	S	L	R		S	L	R
Leptospirosis (Weils Disease)	4	3	12	Pest control contractor to be called to rid area of rodents as far as possible, and visits to be made regularly to keep vermin at bay. All operatives must maintain good levels of personal hygiene. Operatives must never touch dead animals. If feeling flu like symptoms with severe headaches/sickness to report to G.P. immediately and inform of the fact that you have worked in a vermin contaminated area. All operatives to be instructed in the symptoms of Leptospirosis and issued with Leptospirosis cards. This can be best achieved by showing Leptospirosis Assessment to medical staff.	4	1	4
Bitten	4	3	12	Disinfect area of wound immediately, apply dressing and seek immediate medical attention. See Leptospirosis Assessment.	4	1	4

Likelihood →	Likely	Probable	Possible	Unlikely	Very unlikely
↓ Severity	(5)	(4)	(3)	(2)	(1)
Death (4)	20	16	12	8	4
Major Injury (3)	15	12	9	6	3
Minor Injury (2)	10	8	6	4	2
No Injury (1)	5	4	3	2	1

KEY: S = Severity

L= Likelihood

R= Risk rating

12-20 High risk
8-10 Medium risk
1-6 Low risk

PPE Required:

Hard hat	As necessary
High vis clothing & boots	Y
Eye/ ear protection	As necessary
Suitable gloves	Y
Respiratory equipment	As necessary
Safety harness	As necessary

Risk assessment to be reviewed every 12 months or following an accident / incident.
